

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (Previously presented): A printer configuration, comprising:

- 81
- a) a computer readable medium comprising data;
 - b) a computer having access to the data on the computer readable medium; and
 - c) a photoprinter in communication with the computer via a communication link, the photoprinter having a selection mechanism and having access to the data over the communication link in response to a user's input to the selection mechanism,
- wherein the photoprinter comprises a printing device capable of processing and printing digital photographs, acquired by a digital camera, independent of an external host device.

Claim 2 (Original): The printer configuration of claim 1, further comprising a user interface on the photoprinter having a plurality of options selectable by a user with the selection mechanism.

Claim 3 (Original): The printer configuration of claim 2, wherein the options include downloading files from the computer, uploading files to the computer, or printing files.

Claim 4 (Original): The printer configuration of claim 2, wherein the one or more files are presented on the user interface.

Claim 5 (Original): The printer configuration of claim 1, wherein the data comprises digital photographs.

Claim 6 (Original): The printer configuration of claim 1, wherein the data comprises executable code for running on the photoprinter.

Claim 7 (Original): The printer configuration of claim 1, wherein the computer is connected locally to the photoprinter.

Claim 8 (Cancelled).

Claim 9 (Original): The printer configuration of claim 1, wherein the computer is a server.

Claim 10 (Cancelled).

Claim 11 (Previously presented): A printer configuration, comprising:

- 8,
- a) a computer having a plurality of digital photographs on a computer readable medium; and
 - b) a photoprinter communicating with the computer via a communication link, the photoprinter having means for accessing the digital photographs, wherein the photoprinter comprises a printing device capable of processing and printing digital photographs, acquired by a digital camera, independent of an external host device.

Claim 12 (Previously presented): A method for accessing digital photographs on a computer, the method comprising the steps of:

- a) establishing a communication link between a photoprinter and the computer;
- b) receiving a request at the photoprinter from a user; and
- c) accessing the digital photographs with the photoprinter in response to the request, wherein the photoprinter comprises a printing device capable of processing and printing digital photographs, acquired by a digital camera, independent of an external host device.

Claim 13 (Original): The method of claim 12, wherein the step of accessing comprises downloading the digital photographs.

Claim 14 (Cancelled).

Claim 15 (Previously presented): A method for diagnosing a stand-alone printer, the method comprising the steps of:

- a) establishing a communication link between the stand-alone printer and a computer;

- b) receiving instructions from the computer at the stand-alone printer via the communication link; and
- c) diagnosing one or more functions of the stand-alone printer in accordance with the received instructions,

wherein the stand-alone printer is capable of processing and printing digital photographs, acquired by an external device, independent of an external host device.

Claim 16 (Original): The method of claim 15, wherein the instructions comprise content to be presented on a display of the stand-alone printer.

Claim 17 (Original): The method of claim 15, further comprising the step of the computer processing user inputs to the stand-alone printer.

Claim 18 (Cancelled).

Claim 19 (Cancelled).

Claim 20 (Previously presented): The method of claim 15, further comprising presenting a menu on a display of the stand-alone printer, wherein the one or more functions are diagnosed after a diagnostic mode is chosen from the menu.

Claim 21 (Previously presented): The method of claim 15, wherein the computer does not process the digital files.

Claim 22 (Previously presented): The method of claim 15, wherein the step of diagnosing one or more functions comprises interacting with a user of the stand-alone printer to determine if the one or more functions performs correctly.

Claim 23 (Previously presented): The method of claim 22, wherein the step of interacting with a user further comprises displaying on a display of the stand-alone printer a suggestion for fixing a problem diagnosed with respect to the one or more functions.

Claim 24 (Cancelled).

Claim 25 (Currently amended): The method of claim 15, wherein the computer is capable of:

- a) writing to a display of the stand-alone printer;
- b) reading an input from a selection mechanism of the stand-alone printer;
~~wherein a user provides the input in response to the display;~~
- c) reading memory associated with the stand-alone printer; and
- d) sending data to a print controller of the stand-alone printer.
